tako@MacBook-Pro-de-Arturo PW1 % git push origin main
To https://github.com/TAKO1428/PW-1
 ! [rejected]        main -> main (fetch first)
error: failed to push some refs to 'https://github.com/TAKO1428/PW-1'
hint: Updates were rejected because the remote contains work that you do
hint: not have locally. This is usually caused by another repository pushing
hint: to the same ref. You may want to first integrate the remote changes
hint: (e.g., 'git pull ...') before pushing again.
hint: See the 'Note about fast-forwards' in 'git push --help' for details.
tako@MacBook-Pro-de-Arturo PW1 % git pull origin main
remote: Enumerating objects: 5, done.
remote: Counting objects: 100% (5/5), done.
remote: Compressing objects: 100% (4/4), done.
remote: Total 5 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
Unpacking objects: 100% (5/5), 2.91 KiB | 497.00 KiB/s, done.

 * branch            main       -> FETCH_HEAD
 * [new branch]      main       -> origin/main
hint: You have divergent branches and need to specify how to reconcile them.
hint: You can do so by running one of the following commands sometime before
hint: your next pull:
hint:
hint:   git config pull.rebase false  # merge
hint:   git config pull.rebase true   # rebase
hint:   git config pull.ff only       # fast-forward only
hint:
hint: You can replace "git config" with "git config --global" to set a default
hint: preference for all repositories. You can also pass --rebase, --no-rebase,
hint: or --ff-only on the command line to override the configured default per
hint: invocation.
fatal: Need to specify how to reconcile divergent branches.
tako@MacBook-Pro-de-Arturo PW1 % git pull --merge

error: unknown option `merge'
usage: git pull [<options>] [<repository> [<refspec>...]]

    -v, --verbose         be more verbose
```

```
    -v, --verbose         be more verbose
    -q, --quiet           be more quiet
    --progress            force progress reporting
    --recurse-submodules[=<on-demand>]
                          control for recursive fetching of submodules

Options related to merging
    -r, --rebase[=(false|true|merges|interactive)]
                          incorporate changes by rebasing rather than merging
    -n                    do not show a diffstat at the end of the merge
    --stat                show a diffstat at the end of the merge
    --log[=<n>]           add (at most <n>) entries from shortlog to merge commit message
    --signoff[=...]       add a Signed-off-by trailer
    --squash              create a single commit instead of doing a merge
    --commit              perform a commit if the merge succeeds (default)
    --edit                edit message before committing
    --cleanup <mode>      how to strip spaces and #comments from message
    --ff                  allow fast-forward
    --ff-only             abort if fast-forward is not possible
    --verify              control use of pre-merge-commit and commit-msg hooks
    --verify-signatures   verify that the named commit has a valid GPG signature
    --autostash           automatically stash/stash pop before and after
    -s, --strategy <strategy>
                          merge strategy to use
    -X, --strategy-option <option=value>
                          option for selected merge strategy
    -S, --gpg-sign[=<key-id>]
                          GPG sign commit
    --allow-unrelated-histories
                          allow merging unrelated histories

Options related to fetching
    --all                 fetch from all remotes
    -a, --append          append to .git/FETCH_HEAD instead of overwriting
    --upload-pack <path>  path to upload pack on remote end
    -f, --force           force overwrite of local branch
    -t, --tags            fetch all tags and associated objects
    -p, --prune           prune remote-tracking branches no longer on remote
    -j, --jobs[=<n>]      number of submodules pulled in parallel
    --dry-run             dry run
    -k, --keep            keep downloaded pack
    --depth <depth>       deepen history of shallow clone
    --shallow-since <time>
                          deepen history of shallow repository based on time
    --shallow-exclude <revision>
                          deepen history of shallow clone, excluding rev
    --deepen <n>          deepen history of shallow clone
    --unshallow           convert to a complete repository
    --update-shallow      accept refs that update .git/shallow
    --refmap <refmap>     specify fetch refmap
    -o, --server-option <server-specific>
                          option to transmit
    -4, --ipv4            use IPv4 addresses only
```

```
                         GPG sign commit
     --allow-unrelated-histories
                         allow merging unrelated histories

Options related to fetching
    --all                fetch from all remotes
    -a, --append         append to .git/FETCH_HEAD instead of overwriting
    --upload-pack <path> path to upload pack on remote end
    -f, --force          force overwrite of local branch
    -t, --tags           fetch all tags and associated objects
    -p, --prune          prune remote-tracking branches no longer on remote
    -j, --jobs[=<n>]     number of submodules pulled in parallel
    --dry-run            dry run
    -k, --keep           keep downloaded pack
    --depth <depth>      deepen history of shallow clone
    --shallow-since <time>
                         deepen history of shallow repository based on time
    --shallow-exclude <revision>
                         deepen history of shallow clone, excluding rev
    --deepen <n>         deepen history of shallow clone
    --unshallow          convert to a complete repository
    --update-shallow     accept refs that update .git/shallow
    --refmap <refmap>    specify fetch refmap
    -o, --server-option <server-specific>
                         option to transmit
    -4, --ipv4           use IPv4 addresses only
    -6, --ipv6           use IPv6 addresses only
    --negotiation-tip <revision>
                         report that we have only objects reachable from this object
    --show-forced-updates
                         check for forced-updates on all updated branches
    --set-upstream       set upstream for git pull/fetch

tako@MacBook-Pro-de-Arturo PW1 % git config pull.rebase false
tako@MacBook-Pro-de-Arturo PW1 % git pull origin main

From https://github.com/TAKO1428/PW-1
 * branch            main       -> FETCH_HEAD
fatal: refusing to merge unrelated histories
tako@MacBook-Pro-de-Arturo PW1 % git pull origin main --allow-unrelated-histories

From https://github.com/TAKO1428/PW-1
 * branch            main       -> FETCH_HEAD
Merge made by the 'ort' strategy.
